Eichmann Memoirs
REFERENCE: /EICHMANN/ 21 December 1960

1. Enclosed herewith is the thermofax reproduction of the
Eichmann memoires: photostat which is in possession.

2. I sympathize with the person who will read the attach-
ment. We regret the quality of the reproduction but assure you
it was not the thermofax process which was at fault but the
photostat from which we had to copy. Some pages are obviously
illegible and they were also illegible on the photostat.

3. As to the readability I can read it if I have to but it
is very slow going. I tell me that a person used to
reading German manuscript should have no trouble.

4. We have made no attempt to compare the attached manu-
script with the material published in LIFE nor have we attempted
any other analysis.

5. I made a great point about the sensitivity of
this material from the point of view of his relation-
ship with . There are obviously several copies of
the memoires in existence and there is no reason why KUBARK
should not have obtained a copy somewhere. But under no cir-
cumstances should it be revealed that we obtained a copy in
Hamburg.
