U.S. Air Force Fact Sheet
RQ-170 SENTINEL

Mission
The RQ-170 is a low observable unmanned aircraft system (UAS) being developed, tested and fielded by the Air Force. It will provide reconnaissance and surveillance in support of the joint forces commander.

Background
The Air Force's RQ-170 program leverages the Lockheed Martin Advanced Development Programs and government efforts to rapidly develop and produce a low observable UAS. The RQ-170 will directly support combatant commander needs for intelligence, surveillance and reconnaissance to locate targets.

The RQ-170 is flown by Air Combat Command's 432nd Wing at Creech Air Force Base, Nev., and the 30th Reconnaissance Squadron at Tonopah Test Range, Nev.
