Section A - References and Responsibilities (U)

1. (U) References. Portions of these references can be applied to opportunity reporting. The SIO (or installation commander, or designated representative, where no intelligence functions exist) at each USAFE installation should have ready access to the following publications:

   a. (U) AFR 110-26, and USAFE Supplement 1, Procedures for Handling Requests for Political Asylum and Temporary Refuge.

   b. (U) AFR 125-25, Prisoners of War.

   c. (U) AFR 200-19, Conduct of Intelligence Activities.

   d. (U) AFR 200-26 (S) USAF Participation in the Defector Program (U).

Supersedes USAF 200-6, 25 February 1988. (See signature page for summary of changes.)

No. of Printed Pages: 26

OPR: INYX P (N. Schulze)
Approved by: Col Patrick K. Branch
Editor: Carolyn Huetstch
Distribution: X: (See signature page.)

CLASSIFIED BY: DIAM 58-13, 28 March 1988
DECLASSIFY ON: OADR
e. (U) AFR 200-30 and USAFE Supplement 1, (S) Acquisition and Reporting of Information Relating to National Security (U).

f. (U) AFR 205-57, Reporting and Countering the Hostile Human Resources Intelligence Threat (FOUO).

g. (U) AFR 206-2, Volume I, Ground Defense of Main Operating Bases, Installations, and Activities.

h. (U) EUCOM Directive 55-14 (S) Agreement Between the United States and USSR on the Prevention of Dangerous Military Activities (U).

i. (U) EUCOM Directive 55-27, Procedures for Processing Recovered Personnel.

j. (U) USAFE 30-21, Non-Duty Travel to Communist Control Countries.

k. (U) USAFE 55-28, (S) Communist-Controlled Aircraft Landing at US Military Installations Overseas (U).

l. (U) The Geneva Convention Relative to the Treatment of Prisoners of War (AFP 110-20, Chap 3).

m. (U) Army Field Manual 30-15, Intelligence Interrogation. (Not Mandatory).

n. (U) FTD OPSPLAN 200-85-1, (S/NF) HAVE BRIDGE, 1 Feb 86 or FTD 200-6, (S/NF) Acquisition, Processing, and Reporting of Foreign Material (U).

2. (U) Responsibilities:

f. (U) Installation commanders and SIO are responsible for applying the concepts of CREEK GRAB across the broad base of human resources available. The SIO will assume office of primary responsibility (OPR) functions at base level. Local potential should be assessed to fulfill the intent of CREEK GRAB and steps taken to inform selected personnel about the mutually supportive aspects of opportunity collection, and on local reporting procedures.

1. (U) In peacetime, non-USAFE Air Force units operating in the USAFE theater are encouraged to participate in CREEK GRAB. In wartime, all Air Force units operating in the USAFE theater will participate in CREEK GRAB.
3. (U) Messages. Transmit all messages prescribed in this regulation MINIMIZE considered.

Section B - Opportunity Collection (U)

4. (U) Concept:

a. (U) During peacetime, USAFE military, Department of the Air Force (DAF) civilian personnel, other US employees, and contractors may occasionally have opportunities to acquire information of intelligence value either while performing their normal duties or by pure chance. Opportunity collection applies to nonduty travelers. Information collected by duty travelers is covered by AFR 200-3D and USAFE Supplement 1.

b. (U) USAFE intelligence personnel must be able to respond effectively to unexpected opportunities for foreign intelligence collection in peacetime, as well as in wartime. Therefore, one of the primary purposes of CREEK GRAB is to have cadres of intelligence conscious local officials who support their local SIU with timely tip offs.

c. (U) Examples of potential intelligence contributors are:

3 (U) Amateur radio operators (may respond to paragraph 1e).

4 (U) Persons in contact with foreign friends and relatives (pay close attention to paragraphs 1h and e).

d. (U) If properly pursued, opportunity collection can be a good source of valuable intelligence. However, this regulation should not be construed as a license to conduct clandestine intelligence activities. All CREEK GRAB monitors and other affected parties will be fully familiar with paragraph 6.

5. (U) Procedures:

a. (U) Base-level OPRs will act as a filter center for reporting opportunities which surface through their liaison with security police, personnel, and operations officers. OPRs should arrange a system of local CREEK GRAB alerting and reporting that can be practiced by the officials involved.

b. (U) Report CREEK GRAB inputs from the local-level by message to ESAA LINDSEY AS GE//INOS//, and HQ USAFE RAMSTEIN AB GE//RWO//INXP//IN-CMO//, with an information copy to Det 3, FTD, Lindsey AS GE//CC//. Report at a precedence high enough to ensure timely delivery. Immediately report information on the imminence of hostilities (ION) to HQ USAFE/RWO, IN-CMO, and BFINK MHE BOERFINK MTK GE// by the fastest means possible.

1 (U) Give CREEK GRAB messages a subject line such as "CREEK GRAB REPORT HAB 9001 (U)," (which indicates Hahn Air Base first CREEK GRAB message of 1990).

2 (U) There is no particular format for a CREEK GRAB message input. However, the message should be brief and properly classified. Use the example at attachment 1 as a guide. Base intelligence personnel should not assume a thorough debriefing role for the purpose of getting out a preliminary CREEK GRAB message unless the details of the information, such as the imminence of hostilities, will be critical to the message recipients. Put the name and secure telephone number of the person monitoring the CREEK GRAB case at the end of the message.

3 (U) If speed is essential, use secure telephone to contact the Ramstein Warning Office (RWO), STU III 480-6871. RWO is manned 24 hours and will relay information to HQ USAFE/IN-COM. If necessary, the Tactical Fusion Center (TFC) can be reached at STU III 396-4301.

c. (U) The CREEK GRAB monitor will review inputs and explanatory notes where pertinent, and send a CREEK GRAB message to HQ USAFE/INOS, HQ USAFE/RWO/INXP, and Det 3, FTD for evaluation.

1 (U) When reporting USAF military or civilians who have had, or are about to have a reporting opportunity, give information about them and the perceived opportunity to permit HQ USAFE/INOS a fair evaluation for follow-on exploitation. For example:
(a) (U) Name, date of birth, or approximate age, nationality, languages, and occupation of foreign source.

(b) (U) Circumstances of source's contact with US person or Air Force authority.

(c) (U) If the information deals with imminence of hostilities or other potential emergencies, report all of the intelligence information casually given; or a summary of the information actively offered.

(d) (U) Apparent or stated motivation for supplying the information, including how the source acquired it.

(e) (U) Availability of source for additional questioning.

4. (2) ESAA will act immediately to meet requests for CREEK GRAB assistance. HQ USAF/INXY and ESAA will provide or coordinate with N. MINT collection on analytical assets for provisions of the following:

1. (U) ESAA will provide evaluation of the preliminary report for follow-on actions. HQ USAF/INXY will provide advice and instruction to the local CREEK GRAB monitor on further handling and disposition of the case.

2. (U) ESAA will provide specific debriefing questions from intelligence collection requirements, if any, when the CREEK GRAB monitor requests them to facilitate either local assessment or joint disposition of the case. (This paragraph applies only when the primary source of information is a person such as one described in paragraph 3c, examples (1) and (2)). Specific questions tend to reveal intelligence interests which should not be revealed to foreign nationals or cleared personnel.

3. (U) ESAA representative will conduct initial on-site debriefing, ensure in-depth debriefing is conducted if required, and prepare final reporting in standardized format for dissemination.

4. (2) HQ USAF/INXY will provide feedback to CREEK GRAB monitor on the value of their contributions.
5. (U) In coordination with ESAA, HQ USAFE/INXY will provide initial training or periodic briefing of base and unit intelligence personnel and other key officials when requested by the local CREEK GRAB monitor.

6. (U) Security and General Instructions:

a.

7. (U) Applicability. All the provisions of the section are applicable only during peacetime. Thereafter, while ESAA will try to meet all requests for linguist-interrogator assistance under the reporting guidance in this section, it is to be expected that thinly spread resources and movement problems may hinder timely provision of requested assistance.

Section C - Defectors, Walk-Ins, and Persons Seeking Political Asylum (U)
9. (U) Policy Guidance:

a. (U) It is the general policy of USAFE not to grant political asylum at any of its air bases or installations including separate operating facilities within the territorial jurisdiction of a foreign country. If such a request is received from a walk-in person or through written or other means, the person seeking refuge will be advised to apply in person at the nearest American Embassy or Consulate.

b. (U) Responsiveness to requests for temporary refuge must be positive and rapid. US personnel to whom such situations could be presented by virtue of position, accessibility, or geographic location are required to be familiar with AFR 110-25 and USAFE Supplement 1. Such personnel include, for example, security police at entrances to USAFE air bases, installations, and facilities because of the accessibility to public approaches. Do not grant temporary refuge aboard USAFE aircraft because of the vulnerability to hijacking.

c. (U) Treat requests for political asylum which also meet the definition of a request for temporary refuge as requests for temporary refuge.

d. (U) Do not release to the public or media information that concerns defectors, requests for political asylum, or temporary refuge submitted at any USAFE air base or other installation, including separate operating facilities within the territorial jurisdiction of a host country. Refer to HQ USAFE/PAM all public or news media requests for information. Should any news release or public statement be authorized, forward a verbatim text of the release or statement to all the addressees listed in AFR 110-25, as supplemented.

10. (U) Defector Program Operating Procedures:
11. (U) Political Asylum or Temporary Refuge Operating Procedures:

   a. (U) Granting of Political Asylum. When an Air Force official receives a request from a foreign national for assistance in forwarding a request for political asylum in the U.S., notify the servicing AFOSI unit, and advise the foreign national to apply in person at the nearest American Embassy or Consulate. In addition, if:

      (1) (U) The request is received by an Air Force member or employee who is serving under the direction of chief of a diplomatic mission, it must be handled according to instructions issued by that mission.

   (2) (U) There being no contrary instructions issued by the chief of the diplomatic mission, the Air Force official who receives the request must communicate the request by IMMEDIATE precedence message to the USAF Operations Center according to paragraph 10a(2) and send information copies to:

      (a) (U) The Office of the Judge Advocate General, International Law Division, HQ USAF WASH 200/2AC/1/.
b. (U) Granting of Temporary Refuge. The senior Air Force commander present or a designated representative may grant temporary refuge to a foreign national for humanitarian reasons, on request, according to AFR 110-26 as supplemented, when it appears under urgent conditions necessary to secure the life or safety of a foreign national against imminent danger. The commander or designated representative sets procedures for granting temporary refuge when appropriate, and for determining when such refuge should be granted. The official who grants temporary refuge must:

(1) (U) Call the local AFSAC unit, simply refer to "a Seven Bridges matter," and request assistance. No further details will be disclosed.

(2) (U) Call HQ USAFE/INX, and HQ USAFE Ramstein Warning Office (RWO), and HQ USAFE/DO. HQ USAFE/INX may be called (during duty hours) at Ramstein military 480-6947 or STU III 480-7405. HQ USAFE/RWO may be notified at Ramstein military 480-6871 or STU III 480-6872, HQ USAFE/DO may be notified at Ramstein military 480-7705 or STU III 480-7710. Message addresses are: HQ USAFE RAMSTEIN AB GE//INX/INO/DO/.

(3) (U) Protect the foreign national.

(4) (U) Report the circumstances to the USAF Operations Center according to paragraph 11a(2) and furnish as much of the information requested in attachment 3 as possible.

(5) (U) Send information copies of the first and any subsequent message to the following:

(a) (U) The Office of the Judge Advocate General, International Law Division, HQ USAF WASH DC//JACI/.

(b) (U) The appropriate American Embassy or consular office.

(c) (U) HQ USEUCOM VAHINGEN GE//ECJ2-OD/.

(d) (U) HQ USAFE RAMSTEIN AB GE//RWO/INO/.

(e) (U) NUMBERED AIR FORCE//IN/.

(f) (U) HQ AFSAC/CC/INO FT BELVOIR VA 22060-5000.

(g) (U) HQ USAFE/JAI.

(h) (U) HQ ESAA LINDSEY AS GE/INO.

(6) (U) Base-level personnel confronted with the situation will:

(a) (U) Notify the commander or designated representative.
(b) (U) Remain with the walk-in until arrival of the notified officials.

(7) (U) The commander or designated representative will:

(a) (U) Notify the AFOSI.

(b) (U) Immediately remove the individual to a US-controlled, nonpublic, protected area.

(c) (U) Disarm the individual if armed. If the individual consents, associated search of person will be thorough, but polite and performed out of public view. Search of a female may be deferred until it can be performed by a woman (US citizen or non-US national) who is a US employee.

(d) (U) Under no circumstances confine or restrain the individual, if the person wishes to leave the installation.

(e) (U) Arrange to make the individual as comfortable as possible, including furnishing food and lodging.

(f) (U) Make no commitments of any kind and limit the conversation to polite exchanges.

(g) (U) Assure that a US national is present at all times during individual voluntary custody, until relieved or instructed otherwise by the AFOSI.

(h) (U) Identify the responding OSI representatives.

(i) (U) Turn over weapons and any other materials received or removed from the individual to the custody of the OSI representative.

(j) (U) The commander terminates temporary refuge only on direction from the USAF Operations Center.

c. (U) Message to the USAF Operations Center. Send the communications required by paras 10 and 11 by IMMEDIATE precedence message (MINIMIZE considered) or by telephone to the USAF Communications Center at the addresses in (1) thru (3) below. If the communication is made by telephone, it must be confirmed with an IMMEDIATE precedence message as soon as possible. If the initial message is not a complete report, send subsequent messages by IMMEDIATE precedence to forward any additional information requested in attachment 3 or otherwise, as soon as it becomes available.

(1) (U) Electrical message address: HQ USAF WASH DC//X000A//.

(2) (U) Mail address: HQ USAF/X000A, Washington DC 20330-5000.

(3) (U) Telephone: Major Commands: Direct line COPAN Circuit.

Telephone Numbers:
Primary number: 227-6103.
Secondary number: 225-3504.
Commercial line: 202-695-7220

Section D - Processing Enemy Prisoners of War (EPW) (U)

12. (U) Concept of Operations. The role of USAFE units in processing EPWs includes securing EPWs and their possessions; determining their identity, preliminary status, and knowledge of intelligence value; passing notification to higher headquarters; and reporting of any time-sensitive indication of Hostilities (IOH) intelligence, if appropriate. Initial screening of EPW for information of counterintelligence and base ground defense value is a responsibility of the SIG, while detailed interrogation for information of positive intelligence value is a responsibility of EAAA and counterintelligence is the responsibility of AFOSI.

a. (U) Training. The base-level SIG will act as OPR and will be responsible for monitoring implementation of the procedures in this section and in the prisoner handling checklist (attachment 1). For a fully effective operation, local EPW OPRs should have available and be familiar with the referenced documents and should use these references to expand the checklist to fit local conditions. Provide an information copy of expanded checklists to HQ USAFE/INX, IN-FA, and EAAA.

b. (U) Prisoner Categories. Enemy nationals may be bona fide EPWs or may profess to be deserters, civilian noncombatants, battlefield refugees, or persons of some other status. USAFE installation-level EPW OPRs will handle all enemy nationals in wartime as EPW until their identity and status can be definitely established, preferably with the aid of a EAAA interrogation team.
b. (U) Injured EPW. If an EPW has injuries at the time of capture, provide medical evaluation and treatment before questioning. Do not relax security precautions, and guard closely to preclude escape attempts or other incidents. If medical authorities determine that the EPW is seriously injured, the EPW will be hospitalized or evacuated under guard, and interrogation will be deferred. If injuries are deemed minor, provide the EPW necessary first aid and then release to the EPW CFA for questioning.

c. (U) Female EPW. Make every reasonable attempt to have female EPW searched by female personnel in a setting which will provide reasonable privacy. This may necessitate transferring the EPW from the scene of capture before conducting a thorough search. If an exercise heightened security until the EPW has been fully searched.

J. (U) Equipment and (or) Personal Effects. Immediately confiscate and tag all items in the EPW's possession, including any item which may have been trapped or discarded at the point of capture. In the event of multiple captures, keep property separately identified with each EPW. AP Form 170, Captive and Equipment and Document Tag, or AP Form 53, Evidence Tag, can be used for this purpose.

1. (U) Deliver items with the EPW to the designated interrogation site. After questioning, if it becomes necessary to store the items away from the EPW's location, provide the EPW with a signed, itemized receipt. A copy of AP Form 53 or AP Form 170 is a receipt for confiscated property.

2. (U) Under the Geneva Convention, EPW identification documents, protective equipment (gas masks, etc.), and any items of purely personal nature with no intelligence value, are returned to the EPW.

e. (U) Screening and Interrogation. As rapidly as possible after capture, the EPW is to be questioned by base-level EPFAs, with assistance from SFET and EAA. In those installations without in-place EAA elements, the local CFA, with assistance of the FQET, will assume responsibility for initial screening. Establish local procedures to generate a quarterly roster of all language-qualified personnel assigned to the installation; provide copies to base-level IN, SF, APFET, and to EAA. The primary EPF CFA should contact one or more individuals with each language represented to verify their proficiency level in the event that they must assist in questioning and to ensure their availability in the event of hostilities.

1. (U) Ensure the prisoner has been strip searched and precede questioning by an examination of documents and other property for any information which might help in the questioning (i.e., unit designators, unit, etc.)
(2) (U) Questioning techniques should be tailored to the prisoner's attitude and behavior. Interrogation should be efficient, businesslike, to the point, and within the guidelines of the Geneva Convention. Initial questioning by base personnel should concentrate on:

(a) (U) The prisoner's identity and status.

(b) (U) Origin, means and (or) route of travel, and reason for being at the point of capture.

(c) (U) Knowledge of any intelligence information relating to the tactical situation, or of significant changes to enemy capabilities and intentions. More routine matters such as troop morale, prisoner's detailed personal history, etc., should be deferred until later. Carefully compare verbal statements with associated documents and equipment to identify any attempts at deception. NOTE: Under terms of the Geneva Convention, prisoners are required to provide their name, grade, service number, and date of birth. This does not prohibit questioning them on other subjects, as long as they are not physically or mentally abused and their right to refuse to answer is acknowledged. All interrogation techniques covered in Army Field Manual 30-15 comply with the Geneva Convention.

(d) (U) If the EPW is uncooperative, terminate the interview and report available information.

f. (U) Notifications and Reporting. The local EPW OPR will provide higher headquarters with notification and results of initial screening via intelligence report (INTREP) as soon as possible, (attachment 4). Use attachment 4 addresses as well as NATO addressees. All INTREPS are NATO releasable. The INTREP will provide a summary of all information available up to that point about the EPW. It will also report the current status of EPW, whether linguistic assistance is required, list of documents or equipment captured with the EPW, and a date/time group reference to the preliminary technical report (PRETECHREP) (attachment 5) which provides full details on them. ESAO will use the initial INTREP notification to determine the appropriate mode of exploitation. ESAO will reply to the capturing unit, giving full disposition instructions and advising whether an interrogation team will be dispatched.

g. (U) Follow-up INTREPS. ESAO mobile interrogation teams or field elements will forward intelligence information gained during the follow-up EPW questioning if deemed necessary in tactical interrogation report (TACINTREP) format. TACINTREPS which report substantive intelligence should include other addresses as required by local procedure, or the content of the report. Precedence of follow-on TACINTREPS will be determined by the intelligence content.

h. (U) Reporting Formats. Prepare reports according to sample formats in attachments 4 and 5.

a. (U) Definitions:

(1) (U) Document - Any handwritten, printed or typed material; painted and (or) drawn (or) engraved material; sound or voice recordings; imagery; and reproductions of the foregoing; by whatever process produced.

(2) (U) CED - Captured enemy documents.
(3) (U) ATO - Associated technical documents. ATOs are those documents captured along with an associated item of enemy equipment. Their handling differs from other CED. See paragraph 16.

(1) (U) Secure and safeguard CED in an area selected by the unit intelligence section. Accurately note details of the capture location and circumstances for later use.

(2) (U) Unit intelligence personnel will screen the document to identify its nature and intelligence significance. CBPO records will be screened to identify qualified linguists from the local population if necessary. Initial CED screening will concentrate on identifying the document and obtaining a general synopsis of its contents, rather than a full translation.

(3) (U) As soon as possible after sufficient information has been obtained, the capturing unit will prepare a PRETECHREP (see attachment 5) for message transmission. The precedence of this report will reflect the content. Urgent perishable information should be assigned immediate or higher precedence, while more routine information may be reported at a lower precedence.

(4) (U) In preparing the PRETECHREP, the capturing unit will also prepare a durable document tag fully identifying the document and the circumstances of its acquisition. (AF Form 52, Evidence Tag, used by security police for found property or evidence is excellent for this purpose.)

(6) (U) CED found in the possession of EPW should be screened immediately and used, if appropriate, as aids during the initial questioning of the individual(s). The association of the CED with the prisoner should be pointed out in both the INTREP (attachment 4) and the PRETECHREP (attachment 5).

NOTE: For convenience, you may combine the two as a two-part message.

   c. (U) Reporting Formats. See paragraph 14.

   d. (U) Procedures for HQ ESAA Processing:
a. (U) Definitions:

(1) (U) CEE. Any nondocumentary material such as weapons, cipher equipment, communications equipment, computers, aircraft, tanks, etc.

(2) (U) ATD. Such as technical manuals, operating instructions, flight publications, code books, and similar documentary items which are captured with CEE and may serve to facilitate the intelligence exploitation of the latter.

b. (U) Procedures for Capturing Units:
(3) (U) Base-level Phase I debriefings should be conducted in a friendly, comfortable atmosphere designed to reassure the returnee of his or her safety and expedite the processing.

c. (U) Reporting Formats. USAFE installations are to report every Phase I initial debriefing. See SPOT intelligence report (SPIREP) or attachment 4 for INTREP format and classify reports SECRET.

PRISONER HANDLING CHECKLIST (U)

The following identifies the most important tasks to be accomplished by USAFE installations which acquire enemy prisoners in wartime. Every using installation will amplify it as necessary to include pertinent local information.

Date/Time/Completed

A1-1. Individual immediately apprehended by SP.
A1-4. Handcuff, blindfold, and transport EPW to designated location.
A1-5. Prevent EPW from observing surroundings.
A1-6. If applicable, give EPW medical aid before interrogation.
A1-7. Conduct complete search of EPW to include personal effects and clothing upon arrival at designated holding site.
A1-8. Notification send to HQ USAFE/INYXP ASAP.
A1-9. Screen base resources for linguist, if required.

KEY POINTS:

Assume the EPW is dangerous. Maintain tight security at all times, regardless of outward behavior.

Treat all wartime captives as EPWs, regardless of professed status, until status has been ascertained according to the Geneva Convention relative to the treatment of prisoners of war, Article V.
PROCEDURES FOR PHOTOGRAPHING AIRCRAFT (U)

A2-1. Use a 35mm camera with fine grain film (normally low speed/ASA) when possible. When 35mm is used and processing facilities are available, standard 5x7-inch prints are desired.

A2-2. Keep accurate photo log (f/stop, film type, lighting conditions, shutter speed, accurate distance to the vehicle); if possible, place a measurement reference against the object being photographed.

A2-3. Do a walk-around of the aircraft, taking full view photos at the 12, 3, 6, and 9 o'clock angles. Special interest areas such as the engines and radome should be photographed closeup and at different angles if possible.

A2-4. Closeups:
   a. Cockpit interior (use color film, if possible), detailed.
   b. Weapons systems controls, panel instruments.
   c. Seat(s).
   d. Weaponry. Serial number of markings, pylons, rack systems.
   e. Electronics gear (avionics, radar, black boxes, etc.).
   f. Propulsion system (air intake, variable geometry, fuel ports, and fuel tankage).
   g. Documents, maintenance records; if possible, try to get pictures of each page.
   h. Use plumb bobs and straight edge planks to indicate angles or curvature, if possible.

A2-5. Go over the aircraft for observational comments not apparent in photos. Record serial numbers, wording not likely to be seen in photos, etc.

A2-6. Forward all negatives, prints, photo log, and comments to HQ USAFE/INO or FTD/SQN.

NOTES:
1. DO NOT PILFER PARTS OR TOUCH GADGETRY (SAFETY).
2. IN HANDLING AIRCRAFT, USE DISCRETION. GET THE JOB DONE QUICKLY—AVOID CONFLICT WITH CREW, LOCAL POLICE, AND DIPLOMATIC PERSONNEL.
3. DO NOT REMOVE DOCUMENTS OFFICIALLY. PHOTOGRAPHING IS BETTER, IF POSSIBLE.
4. AVOID POLITICAL PROBLEMS.
Figure A2-1. (U) Drawing Depicting Aircraft Photography Points (U).
REPORTING DATA FOR REQUESTS FOR POLITICAL ASYLUM OR TEMPORARY REFUGE (U)

Do not delay report of initial requests pending complete development of data.

A3-1. Name and nationality of the individual seeking asylum (or temporary refuge).

A3-2. Date, place of birth, and occupation.

A3-3. Description of any documentation in their possession.

A3-4. What foreign authorities are aware of their seeking asylum (or temporary refuge); whether any foreign authorities will be notified of the request.

A3-5. Circumstances surrounding the request for asylum (refuge).

A3-6. Exact location. If aboard vessel or aircraft, estimated time of arrival (ETA) at next intended port or airport.

A3-7. Reason for claiming asylum or temporary refuge.

A3-8. Description of any criminal charges known or alleged to be pending against the asylum seeker. Also, indicate any sea or air piracy or hijacking background.

A3-9. Any Communist party affiliation or affiliation with other political party; any government office now held or previously occupied.

A3-10. If applicable, whether a field office of the US Immigration and Naturalization Service (INS) has been notified and if arrangements have been made to transfer case to INS.

A3-11. Other pertinent information.
CAPTURING UNIT

INTREP/001/

1. DTG OF CAPTURE: 291338Z

2. PLACE OF CAPTURE: 32ULA76738B/VIC. ATLAY

3. NAME/RANK/SSN/DOB OF EPW: TARCHUK YURI

EVGENOVICH/SERGEANT/430914-10389/14 SEP 43.

4. NATIONALITY/MIL UNIT OF EPW: RUSSIAN/UNIT UNKNOWN.

5. CIRCUMSTANCES OF CAPTURE: PARACHUTED FROM DISABLED TRANSPORT
AIRCRAFT (POSS AN-12 CUB) NEAR VILLAGE OF ALTAY; CAPTURED BY LOCAL
RESIDENT, BROUGHT TO HAHN AB AND TURNED OVER TO US CUSTODY.

6. DOCUMENTS/EQUIPMENT: PRISONER POSSESSED ONLY MILITARY IDENTITY
DOCUMENT AND NORMAL UNIFORM ITEMS; NO DOCS/EQUIP OF INTEL VALUE.

7. EPW KNOWLEDGEABILITY: PRISONER APPARENTLY AIRCREW MEMBER ON CUB
AIRCRAFT. SHOULD HAVE SOME INFORMATION ON MISSION, ENEMY INTENTIONS,
BUT SO FAR HAS REFUSED TO ANSWER QUESTIONS. COMPLETELY SANITIZED
UNIFORM, CARRIED NOTHING OF INTEL VALUE, HAS THUS FAR SUCCESSFULLY
RESISTED INTERROGATION BY REMAINING SILENT WHEN ASKED MILITARY
QUESTIONS.

8. SUMMARY OF INFORMATION OBTAINED: SEE 7 ABOVE.

9. STATUS OF EXPLOITATION: PRISONER STILL BEING INTERROGATED BY IN
PERSONNEL, USING RUSSIAN-SPEAKING NCO LOCATED THROUGH CBPQ. NCO'S
LANGUAGE CAPABILITY IS LIMITED, MAKING EFFECTIVE INTERROGATION
DIFFICULT. REQUEST USAFE/INXY ASSISTANCE ASAP; POC IS MAJ JONES,

BLDG 347, RM 121, AUTOYON XXX-XXX, HAHN AB. SO FAR PRISONER HAS spoken ONLY RUSSIAN. DOES NOT APPEAR TO KNOW
OTHER LANGUAGES.
