National Security Decision Memorandum 35

TO: The Vice President
    The Secretary of State
    The Secretary of Defense
    The Director, Central Intelligence Agency
    The Director, Arms Control and Disarmament Agency
    The Director, Office of Emergency Preparedness
    The Director, Office of Science and Technology

SUBJECT: United States Policy on Chemical Warfare Program
          and Bacteriological/Biological Research Program

Following consideration by the National Security Council, the President
has decided that:

1. The term Chemical and Biological Warfare (CBW) will no longer
   be used. The reference henceforth should be to the two categories
   separately -- The Chemical Warfare Program and The Biological
   Research Program.

2. With respect to Chemical Warfare:
   a. The objective of the U.S. program will be to deter the use
      of chemical weapons by other nations and to provide a
      retaliatory capability if deterrence fails.
   b. The renunciation of the first use of lethal chemical weapons
      is reaffirmed.
   c. This renunciation is hereby applied to incapacitating
      chemical weapons as well.
   d. This renunciation does not apply to the use of riot control
      agents or herbicides. A special NSDM on authorization for
      their use will be issued.
g. The Secretary of Defense, in cooperation with the Director of the Office of Science and Technology, shall continue to develop and improve controls and safety measures in all Chemical Warfare programs.

i. The Under Secretaries Committee shall conduct an annual review of United States Chemical Warfare programs and public information policy, and will make recommendations to the President.

3. With respect to Bacteriological/Biological programs:

a. The United States will renounce the use of lethal methods of bacteriological/biological warfare.

b. The United States will similarly renounce the use of all other methods of bacteriological/biological warfare (for example, incapacitating agents).
c. The United States bacteriological/biological programs will be confined to research and development for defensive purposes (immunization, safety measures, et cetera). This does not preclude research into those offensive aspects of bacteriological/biological agents necessary to determine what defensive measures are required.

d. The Secretary of Defense will submit recommendations about the disposal of existing stocks of bacteriological/biological weapons.

e. The United States shall associate itself with the principles and objectives of the Draft Convention Prohibiting the Use of Biological Methods of Warfare presented by the United Kingdom at the Eighteen-Nation Disarmament Conference in Geneva, on 26 August 1969. Recommendation as to association with specific provisions of the Draft Convention should be prepared by the Secretary of State and the Director of the Arms Control and Disarmament Agency, in coordination with other interested agencies, for the President's consideration.

f. The Secretary of Defense, in conjunction with the Director of the Office of Science and Technology, shall continue to develop controls and safety measures in all bacteriological/biological programs.

h. The Under Secretaries Committee shall conduct an annual review of United States Bacteriological/Biological Research Programs and public information policy, and will make recommendations to the President.
