CONDUCTING SPRAY OPERATIONS IN THE VICINITY OF THE TOWN
OF CHAPARAL, DEPARTMENT OF TOLIMA, AT N 03-51 W 75-34.

PAGE NO. 3
C. 27 May. While preparing to spray in the vicinity of Chaparal at N 03-40 W 75-42, CNP aircraft came under fire again, but were not hit. Pilots of the group's two helicopters, a UH-1H and a Hughes 500, identified the source of the ground fire as coming from a cabin. The two helos moved into position and employed their M-60 machineguns, firing a total of 1,100 rounds into the cabin. No ground fire was returned.

D. 28 May. While overflying the area of the 27 May shooting incident, a CNP UH-1H helicopter (PNC 145) was hit by ground fire, taking one round in the main rotor blade. This single round caused USD 37,000 in damage.

E. 31 May. At an unspecified location, a T-65 Turbo Thrush (PNC 274) was hit twice in one wing.

4. The high concentration of ground fire against eradication aircraft during a two week period indicates a coordinated campaign against poppy fumigation. Prior to 15 May, CNP eradication aircraft had only been fired upon three times in over a year. The effectiveness of the ground fire and multiple hits on aircraft indicates the ambushers are using automatic weapons. Since common poppy growers are peasant farmers working individually, the concerted attack on eradication aircraft suggests some other, more organized force is responsible.

5. The CNP anti-narcotics police director is planning to initiate helicopter-transported ground raids against selected sites in the area as a deterrent to future ambushes. Departmental police commanders plan to participate more fully in these operations. BUSBY##
