Possible Augmentation of Hanoi's MIG Fighter Force

The North Vietnamese may have received as many as 70 jet fighters recently. 50 MIG-21 and 20 MIG-17 aircraft have been received by the North Vietnamese Air Force. The MIG-21s were described as having come from the USSR and being hidden near a mountain — possibly the range north of Phuc Yen Airfield. The location of the MIG-17s, which purportedly came from Kwangsi Province, China, was not indicated.
