1. CONFIDENTIAL

2. Since Honduran peace plan encompasses so many of the
points we have been advocating as part of a possible CADC
arms limitation declaration, we wonder if some official
USG words of public endorsement might be in order. We
could qualify our support in whatever way we wished;
but it appears to us that basic thrust could be positive.
GH would certainly welcome such support. It would also
help reciprocate numerous times we seek their backing for
MAX one or another of our policy positions. Our expression
could be in the form of statement by Department spokesman.
