Russian Nuclear Device in Kazakhstan Destroyed [Redacted]

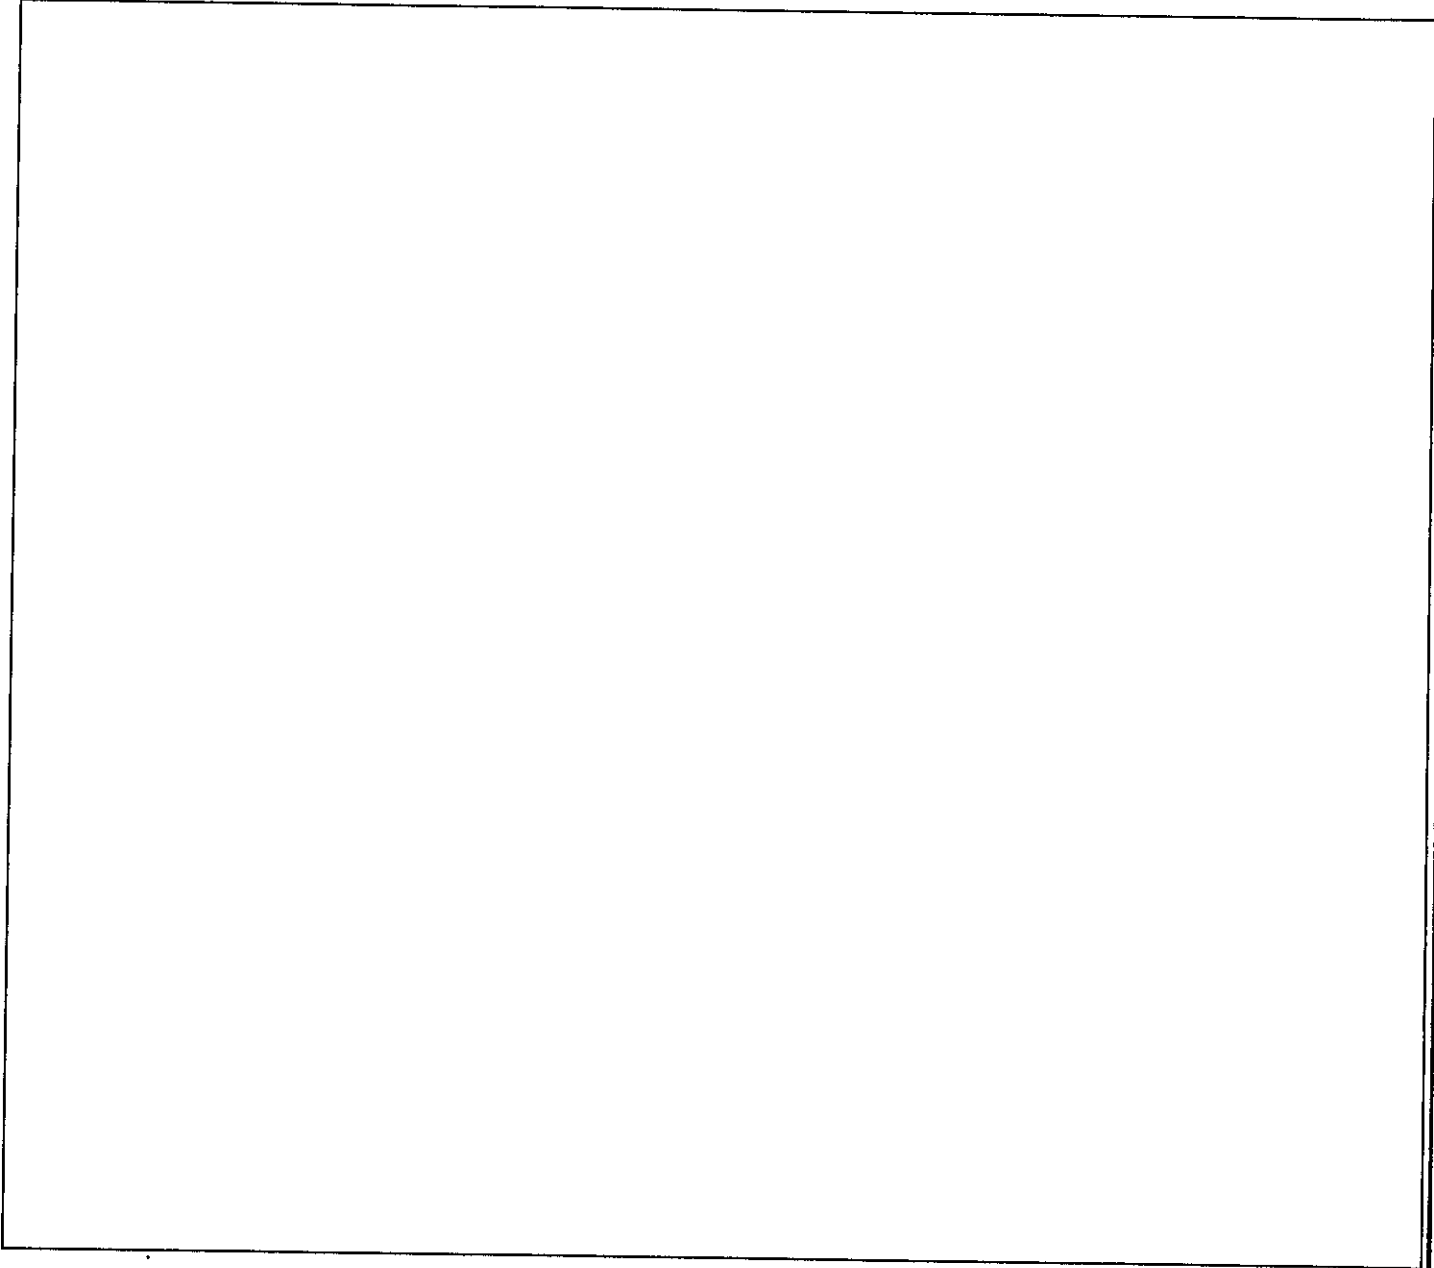

The Russian press recently reported that the nuclear device emplaced in a tunnel at the Degelen Mountain area of the Semipalatinsk nuclear test site in Kazakhstan since 1991 was destroyed on 31 May using 400 kg of high explosives. [Redacted]

[Redacted] The Kazakhstani and Russian media claimed that the explosion did not produce a nuclear yield and that there was no change in the radiation background after the explosion. [Redacted]
