FOR RM/R USE ONLY

NO.: CA-3641 October 19, 1960

SUBJECT: Centrifuge Classification Guide — Revision

TO: BONN, LONDON, THE HAGUE, BRUSSELS USEC

Reference is made to the Department's CA-894 of July 27, 1960.

The Atomic Energy Commission has determined that Topic IV of the Classification Guide for the gas centrifuge program does not adequately describe the information that the topic was intended to classify. The Atomic Energy Commission has therefore revised the section to read as follows:

"Topic IV

- 3. All information on the design, construction, and operation of gas centrifuges (regardless of speed of rotation) which represents an advance in the state of the art beyond that represented by or described in the published literature as of the effective date of this guide (August 1, 1960)."

Please notify the Dutch, the Germans and the U.K. of the change.
